

PROJECT PROPOSAL

MIM Learning Management System – Mobile Application

Mobile Application Design & Development

1. Project Overview

The proposed project is to design and develop a **mobile-based Learning Management System (LMS)** for the Maharaja Institute of Management (MIM). The application will provide students, lecturers, administrators and other authorized users with mobile access to academic, learning, assessment, attendance, payment, communication and administrative services through a centralized platform. The proposed mobile application will be designed and developed **from scratch**, while incorporating the required functionalities of the existing MIM LMS. The existing system currently manages learning delivery, academic administration, assessments, attendance, payments, results and communication through role-based access.

2. Project Objectives

The main objectives of the project are to:

- Develop a dedicated mobile LMS application.
- Provide students with convenient access to learning activities.
- Enable lecturers to manage learning and academic activities.
- Provide administrators with mobile access to system management functions.
- Centralize academic information and learning activities.
- Support assessments, assignments and result management.
- Support attendance management.
- Provide payment submission and payment-status tracking.
- Enable communication between students and lecturers.
- Provide secure role-based access.
- Introducing a structured gamification and achievement system.
- Provide a scalable platform for future LMS functionality.

3. Target Users

The mobile application will support the following user groups

Students

Access learning materials, courses, assignments, assessments, schedules, attendance, payments and results.

Lecturers

Manage modules, learning materials, assessments, assignments, attendance and student communication.

Administrators / Coordinators

Manage students, lecturers, courses, modules, batches, schedules, examinations and other administrative functions.

Finance Administrators

Review and manage student payment information.

Accountants

Access authorized financial information.

Moderators / Directors / Group Directors

Review and approve academic results according to the defined approval process. These user roles are based on the role structure of the existing LMS.

4. Project Scope

The project will cover the following major functional areas.

4.1 User Authentication

- Login
- Logout
- Password recovery
- Password reset
- User profile
- Role-based access
- Secure session management

The existing LMS supports sign-in, password recovery, password reset, profile access and logout.

5. Student Module

The Student Module will be the primary component of the mobile application.

5.1 Student Dashboard

The dashboard will provide access to:

- Current courses
- Learning progress
- Upcoming activities
- Assignments
- Assessments
- Class schedules
- Examinations
- Attendance
- Results
- Payments

- Notifications
- Announcements
- Learning achievements

5.2 My Courses

Students will be able to:

- View enrolled courses
- View course details
- View modules
- View module information
- Access course materials
- Access external learning resources
- Track course progress

The existing LMS provides students with course, module and learning-material access.

5.3 Learning Materials

Students will be able to access:

- Lecture notes
- PDF documents
- Presentations
- Learning files
- External URLs
- Other approved learning resources

Only approved learning materials will be made available to students.

6. Assignment Management

The mobile application will support:

- Assignment listing
- Assignment instructions

- Assignment due dates
- Downloadable assignment files
- File uploads
- Submission comments
- Assignment submission
- Resubmission where permitted
- Submission history
- Marks
- Lecturer feedback

The existing LMS supports assignment submission with file-type, file-size, deadline and attempt restrictions.

7. Assessment Management

The application will support two main assessment types.

MCQ Assessments

- Multiple-choice questions
- Single or multiple answers
- Question navigation
- Previous / Next navigation
- Assessment timer
- Answer review
- Assessment submission
- Automatic submission when the timer expires

Upload-Based Assessments

- Assessment instructions
- Assessment file download
- Answer file upload

- Submission confirmation
- Result release

The current LMS supports both MCQ and upload-based assessments, including timed attempts and result release settings.

8. Schedule Management

Students will be able to view their academic schedules.

Schedule Information

- Course
- Module
- Lecturer
- Date
- Time
- Venue
- Class information

The existing LMS provides students with timetable information including module, venue, lecturer and time.

9. Examination Management

The mobile application will provide:

- Examination calendar
- Upcoming examinations
- Examination date
- Examination time
- Examination venue
- Course information
- Module information

10. Attendance Management

The system will provide attendance-related functionality.

Student

Students will be able to view:

- Attendance percentage
- Attendance history
- Present sessions
- Absent sessions
- Late sessions

Lecturer

Lecturers will be able to:

- View scheduled classes
- Start attendance
- Mark students as Present
- Mark students as Absent
- Mark students as Late
- Save attendance
- View attendance records

The current LMS restricts attendance marking to the permitted class-session window.

11. Results Management

Students will be able to view published academic results.

Functions

- View results
- View marks
- View grades
- View result history

- Download result sheets where available

Results will only be displayed after the relevant approval and publication process.

12. Payment Management

The mobile application will support student payment-related activities.

Course Payments

- View outstanding payments
- View payment amounts
- View due payments
- Submit payment evidence
- Upload bank deposit/transfer slip
- View payment status
- View transaction history

Other Payments

- MIM shirt payments
- Graduation payments
- Other institutional payments

The existing LMS supports course-fee payments, payment evidence uploads, transaction history and other payment categories.

13. Communication Module

The application will provide communication between students and lecturers/coordinators.

Features

- Student-to-lecturer communication
- Lecturer-to-student communication
- Conversation history
- New message notifications
- Message status

The current LMS includes chat functionality for students, lecturers and coordinators.

14. Notification Management

The application will provide notifications for important LMS activities.

Notifications

- New learning materials
- New assignments
- Assignment deadlines
- New assessments
- Assessment deadlines
- Schedule updates
- Examination announcements
- Result publication
- Payment updates
- System announcements
- Messages

15. Lecturer Module

The Lecturer Module will provide access to teaching and academic management functions.

Lecturer Dashboard

- Assigned modules
- Today's schedule
- Pending assignments
- Assessments
- Attendance
- Student messages
- Notifications

Lecturer Functions

- View assigned modules
- Manage learning materials
- Upload files
- Add external URLs
- Create assessments
- Manage assessments
- View student submissions
- Mark assignments
- Provide feedback
- Publish marks
- Manage attendance
- Communicate with students

These functions correspond to the existing lecturer capabilities.

16. Admin / Coordinator Module

The Admin Module will provide authorized users with administrative functionality.

Functions

- Student management
- Lecturer management
- Course management
- Module management
- Batch management
- Schedule management
- Examination management
- Result management
- Grade boundary management
- Learning material approval
- Site news management
- Offered-course management
- Graduation information management
- Payment management

The existing admin module includes these major administrative areas.

17. Student Management

Administrators will be able to:

- Add students
- View students
- Search students
- Update student information
- Manage registration status
- Manage account status

- Import student records
- Export student records
- View student profiles

The current system supports student directory management, Excel import/export and account-status management.

18. Lecturer Management

Administrators will be able to:

- Add lecturers
- View lecturers
- Search lecturers
- Update lecturer information
- Assign modules
- Manage lecturer status
- Export lecturer information

19. Course & Batch Management

The application will support:

Course Management

- Create courses
- Edit courses
- Manage course information
- Manage modules
- Manage course materials

Batch Management

- Create batches
- Edit batches
- Assign courses to batches

- Manage student enrolments
- Manage academic year
- Manage batch information

The existing Batch Operations Hub manages batches, course-batch relationships and student enrolments.

20. Finance Administration

Finance-related users will be able to:

- View payment records
- Review payment evidence
- Verify payments
- Update payment status where authorised
- View transaction history
- Manage other payment options
- Review submitted receipts

The existing role structure separates finance administration and accounting responsibilities.

21. Result Approval

The system will support the academic result approval process.

Process

Result Preparation

↓

Result Checking

↓

Moderator Review

↓

Director Approval

↓

Final Approval

↓

Result Publication

Students will receive access to the result only after publication.

22. Profile & Account Management

Each user will have a dedicated profile area.

Profile

- Profile information
- Contact information
- Academic information where applicable
- User role
- Account status

Account Settings

- Password management
- Notification settings
- Application preferences
- Security settings
- Logout
